Maximiser Media Storage Racks

EDP's original media storage racking, the Maximiser, allows easy storage of media in a small footprint. Originally designed for the 3480 / 3590 Auto-Pac, this rack is compatible with the our DLT/LTO Auto-Pac. Making the Maximiser an ideal solution for data centres migrating from 3590 media storage to DLT or LTO. Instead of changing the racks you simply change the packs.

Features & Benefits

- Available as single sided racks for use against walls or double sided to create aisles.
- Constructed of wire-welded, furniture grade steel and shipped ready to use.
- Bottom two rows are angled for easy cartridge label viewing.
- Auto-Pacs allow easy cartridge removal, whilst the packs can be easily removed for relocation.
- DLT/LTO Auto-Pacs enable DLT or LTO tapes to be stored in the same rack.

Auto II Pac (3480-22A)

- Stores 20 3480 /3590 tapes.
- Spring release system holds tape securely in place, and aids tape retrieval.

Maximiser Sizes:

- Racks are 6 Auto-Pacs high - 1,867mm (73½")
- Single sided racks are 305mm (12") deep.
- Double sided racks are 457mm (18") deep.
- Widths:
  - 2 Pac wide = 622mm (24½")
  - 4 Pac wide = 1,207mm (47½")
  - 5 Pac wide = 1,495mm (58⅞")

DLT-Auto 16 Pac (3480-DLT-16 & 3480-DLT-16R)

- Stores 16 DLT / LTO tapes.
- Optional retention strip holds the tapes securely in place
